

Report for One Week Training on **Research Methodology and Statistical Tools in Forestry**

One week training program “Research Methodology and Statistical Tools in Forestry” was organized by the Division of Forestry Statistics for the technical officers of ICFRE institutes during July 22-26, 2019 at ICFRE Dehradun under the HRD Plan of ICFRE. Total 18 participants were participated in this training. The participants were familiarized with the basic concept of research methodology useful in forestry research. The topics including exploratory data analysis and graphical representations, correlation and regressions, basics on sampling techniques, design of experiments, parametric and non parametric inferences etc. were covered in this training. Exposure to statistical software, using MS excel and R software was also given. Participants provided their feedback about the program. The Valedictory session of the program was chaired by Sh. A. S. Rawat, DDG (Admin), ICFRE in the presence of the other DDGs, ADGs, Scientist of ICFRE (HQ) and the convenors of the training program.
