

Training Programme on Ecology and Biodiversity for Environmental Impact Assessment (06-09 September 2025)

ICFRE-Tropical Forest Research Institute (TFRI), Jabalpur in collaboration with The Wealthy Waste School of India (Developing management skills in environmental governance), Lucknow, U.P. is conducting a “Training Programme on Ecology and Biodiversity for Environmental Impact Assessment” from 6th to 9th September 2025.

Inaugurating the event, Dr. Yashpal Singh, Chairman, The Waste School of India, spoke about the objectives and activities of the institute.

Dr. H.S. Ginwal, Director, ICFRE-TFRI, delivered the inaugural address, emphasizing the urgent need to conserve genetic diversity for its sustainable utilization, cautioning that India has already lost 22 species including the cheetah.

The four-day training programme will cover key aspects of ecology, biodiversity, environmental governance, and their role in Environmental Impact Assessment (EIA). A total of 22 participants from environmental organizations, consultancy firms, and research institutes, across India are attending the programme.
